PROFILE SUMMARY

Results-driven professional with 3 years of engineering experience in product lifecycle management, data analytics, and AI-powered solutions — delivering products for 2,000+ users, reducing downtime risk by 40%, and improving data accuracy by 25%. Skilled in product discovery, predictive modeling, LLM integration, A/B testing, SQL, data visualization, and cross-functional execution.

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Mphasis Ltd., Bangalore

Jul 2024 – May 2025

- Led application validation for a mainframe-to-cloud migration (Fortune 50 client), writing SQL queries for data integrity analysis across parallel systems — reducing downtime risk by 40%.
- Translated ambiguous business requirements into structured user stories and risk dashboards, aligning product, engineering, QA, and architecture teams for sprint-ready execution.
- Optimized ETL data workflows through defect backlog analytics, improving data accuracy by 25% and accelerating downstream business reporting.

Software Engineer – Mphasis Ltd., Bangalore

Jun 2022 – Jun 2024

- Co-developed a resource allocation platform (2,000+ users) — defined KPIs, gathered stakeholder requirements, and led agile delivery across design and engineering teams.
- Improved defect resolution efficiency by 35% through data-driven root-cause analysis and structured quality gates across business, product, and QA teams.

INTERNSHIPS & LIVE PROJECTS

Product Management Intern – Paytm

Aug 2025 – Sep 2025

- Conducted competitive analysis across 8 payment gateways (50+ merchant surveys) to identify feature gaps and inform product roadmap prioritization for the payments vertical.
- Built a centralized product portfolio website for business leaders and product teams, reducing time-to-insight for go-to-market planning and strategic decision-making.

Product Strategy – Navneet Toptech

Nov 2025 – Jan 2026

- Redesigned the user activation funnel for SmartDigibook with a QR-first onboarding flow, projecting 15–18% lift in activation rates through funnel optimization and A/B testing.

AI PRODUCT & ANALYTICS PROJECTS

AI-Powered Security Agent: Built a no-code AI agent (n8n) translating complex security API data into actionable insights for non-technical stakeholders — demonstrating AI workflow orchestration and automated risk prioritization.

AutoDocs – AI SOP Generator: Built a multimodal AI agent (Gemini) to automate SOP creation from video inputs, reducing documentation time by 90% via intent-based reasoning and prompt engineering.

Credit Risk Assessment Model: Developed a multivariate regression model on credit card data to evaluate financial & demographic drivers of credit ratings — performed statistical testing, model diagnostics, and risk interpretation.

Patient Risk & Intervention Model: Built a predictive model analyzing 10,000 patient records, stratifying high-risk populations into targetable personas for data-driven intervention strategies.

EDUCATION

Great Lakes Institute of Management – PGPM (Product Management & Business Analytics)

May 2025 – Apr 2026

Manipal Institute of Technology – B.Tech, Information Technology (Minor: Digital Marketing)

Aug 2018 – Mar 2023

CORE COMPETENCIES

AI & Product:	AI Product Strategy, LLM Integration, Prompt Engineering, Multimodal AI, AI Agent Design, Product Roadmap, PRD, User Stories, Backlog Management, Product Discovery, A/B Testing, OKRs & KPIs, Go-to-Market, Feature Prioritization
Analytics:	SQL, Python, Predictive Modeling, Statistical Analysis, Data Visualization (Tableau), ETL & Data Pipelines, Microsoft Excel, Data-Driven Decision Making
Tools:	Google Analytics, Figma, Notion, Jira, Digital.ai Agility, Scrum/Agile, SAFe AWS Cloud, n8n, Gemini API

CERTIFICATIONS

McKinsey Forward Program (2025) | Certified SAFe 6 Practitioner (2024) | Google Analytics Certification (2025) | AWS Cloud Practitioner Essentials (2025)
